

Who says entrepreneurship can't be fun? In this club, we're diving into the exciting world of starting a business and being your own boss. You'll have the chance to share your creative ideas and learn the essentials of self-sufficiency. Everyone loves making money, so we'll focus on strategies for earning—and keeping—it! Our long-term goal is to establish a **student-run school store**. We'll handle everything from marketing and budgeting to production and development. We'll also explore local businesses, studying their growth and the challenges they've faced compared to those in other areas.

In addition to hands-on projects, we'll have pitch competitions, explore job opportunities, and take field trips. This is your chance to become an entrepreneur, from conceptualizing a product to seeing it through to sales. We also have a variety of supplies to support your creative ideas. Our crafting toolkit includes materials for making soap, candles, epoxy items, jewelry, and custom bags. Plus, we have a Cricut machine for even more crafting possibilities. We'll be participating in craft shows and other events to showcase and sell your creations.

*Selling*

**SCHOOL STORE**

3:15- 4:30
